PROPERLA®
SUPER HYDROPHOBIC COATINGS

FACADE COATING

Lotus Effect Coloured Coating

Keep your property clean and dry

Super Hydrophobic Self-Cleaning

10 year guarantee

Keep your property clean and dry

ProPERLA Facade Coating uses the latest nanotechnology to repel water and dirt and keep your property dry, clean and attractive. It mimics the super hydrophobic and self cleaning capabilities of the Lotus leaf.

Once an exterior wall is treated with ProPERLA Facade Coating it will repel water and stay dry which helps to prevent the associated problems caused by rain penetration and damp.

ProPERLA Facade Coating protects your property -dirt is simply washed away with rainfall, the unsightly growth of moss, algae or lichens is made more difficult, it prevents salt efflorescence and slows the ageing or breakdown of the surface of the building

Super hydrophobic

Instead of absorbing into the treated surface, water forms droplets that simply run off the surface - keeping walls dry.

Breathable

There is no restriction on air and moisture escaping. It does not block the pores of the masonry. It has an SD value of 0.06, way better than 0.50 which is considered breathable.

Colours

Available in a range of timeless pastel colours with a matt finish- perfect for your home. Colour cards with coated samples are available upon request.
